

## Ottoman cover Tips & Hints

Changing stitch is easy on an air threaded serger and helps you to be creative with different stitches. Use the ladder stitch to construct the pattern on this ottoman cover. The sides are decorated with coverstitch using both sides as decoration.

And finally, the piping creates a nice finish. Use this technique to create a custom cover for your ottoman or why not a pillow?

Create piping with the optional piping foot.

Decorate with a wide Coverstitch using both the front and back of the stitch and decorative thread

Stitch the 2" (6cm) strips together with a wide flatlock using the ladder stitch side and decorative thread.
